DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Endo et al (5,645,496). Endo discloses a golf ball comprising a core and a cover. The core has a deflection amount from 3.1 to 4.5 mm with an initial load of 10 kg and a final load of 130 kg (abstract). The cover is made from Himilans 1605 and 1706. The resins are equivalent to applicant's resins (see spec page 12). The cover has a thickness of 1.6 mm. The core has a center JIS-C hardness from 40-56 (22-35 Shore D) and a core surface JIS-C hardness from 70-95 (45-64 Shore D). One of ordinary skill in the art would vary the ranges to enhance the performance features.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Endo et al (5,645,496) in view of Tsunoda et al (2002/0183135). Endo does not disclose organic fibers in the cover. Tsunoda teaches a golf ball cover made from Himilans 1706 and 1605 and organic short fibers [0086]. One of ordinary skill in the art would have modified the cover of Endo for enhanced durability.

Allowable Subject Matter

Claims 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
